OBJECTIVE

Data & Operations Analyst with 7+ years at ICE Data Analytics. Skilled in SQL, Python, Excel, and Tableau, with experience in reporting, data accuracy, and operational analytics. Seeking a Data Analyst role.

PROJECTS

ETL Pipeline and Analytics Dashboard ([GitHub Link](#))

Spring 2026

- Built ETL pipeline and KPI dashboard for e-commerce sales using Python, SQL, and Cursor AI to surface revenue trends.
- Designed PRD and automated workflows to transform raw data into analysis-ready outputs

Text Mining

- [Sentiment Analysis](#): Built TF-IDF based NLP pipeline on IMDB data for sentiment classification; achieved F1 = 0.90
- [Topic Modeling](#): Applied NMF topic modeling on 3 Disneyland parks reviews to extract and compare themes

EXPERIENCE

Data Engineer Intern

Jan 2026 – Present

Propstrata (Startup)

- Developing and maintaining data pipelines for ETL workflows using Python for operational data processing
- Built REST API endpoints to handle data requests and response codes for pipeline monitoring, logging, and error handling, improving reliability and pipeline performance
- Collaborating with engineering team on backend data infrastructure and pipeline architecture

Graduate Research Assistant (SEC Filings Risk Pipeline)

Sept 2025 – Present

Loyola Marymount University

- Conduct applied data science research to extract and analyze risk signals from large-scale financial filings
- Extended Python pipelines to process SEC filings, converting HTML/XBRL into analysis-ready data
- Applied text analysis and keyword detection to surface risk signals in corporate disclosures
- Implemented batch-based ETL processing to scale SEC filing ingestion and extraction across hundreds of companies

Client Support Specialist I & II — (Fixed Income & Operations)

Aug 2018 – Feb 2025

ICE Data Analytics (NYSE)

- Developed metrics and promoted data accuracy within operational reporting workflows
- Validated fixed income pricing and analytics against live market data for institutional clients
- Built KPI dashboards and reports in Excel and Tableau tracking performance for 300+ institutional clients
- Partnered with BI and operations teams to update reporting logic and create user-friendly report formats
- Utilized Salesforce and ServiceNow to track and resolve client cases maintaining high service levels.
- Wrote and maintained SQL queries for reporting and data validation

SKILLS

- **Tools & Technology**: Python, SQL, Snowflake, Salesforce, ServiceNow, SharePoint, Jira, ETL, Power BI, Git, Tableau, Alteryx
- **Data & Analysis**: Data Cleaning, Data Aggregation, Pandas, Report Automation, Trend and Variance analysis, Financial Modeling, Data Mining, Matplotlib, Plotly
- **Machine Learning Algorithms**: Ensemble Methods, LSTM, Neural Networks, Random Forest, Gradient Boosting, XGBM, LLMs, RAG architecture
- **AI & Dev Tools**: Claude Code, Cursor Ai, GitHub Copilot

EDUCATION

Loyola Marymount University – M.S Business Analytics

May 2026

University of California, Santa Barbara – B.S Actuarial Science

Jan 2018
